

**Chicago O'Hare International Airport**  
**Request for Proposals to Design, Redevelop and Operate Concession**  
**Program in Terminal 5 at Chicago O'Hare International Airport**

**Addendum #3**  
**May 13, 2009**

This Addendum is intended to modify the Request for Proposals to Design, Redevelop, and Operate Concession Program in Terminal 5 at Chicago O'Hare International Airport ("RFP") dated February 3, 2009, and amended by Addendum #1 dated March 17, 2009 and Addendum #2 dated April 23, 2009. Unless otherwise defined herein, capitalized terms have the same meaning as in the RFP. In the event of a conflict between the RFP, Addendum #1, Addendum #2, and Addendum #3, this Addendum #3 controls.

**A. Sustainable Design**

As part of the City of Chicago and the Department of Aviation's goal to incorporate environmentally sustainable design in building and infrastructure improvements, each proposal should take into consideration that the awarded developer for the International Terminal 5 RFP will need to provide an accredited Leadership in Energy and Environmental Design (LEED) professional on its staff, upon entering into the final agreement with the Department of Aviation.

The main objectives of sustainable design are to avoid resource depletion of energy, water, and raw materials; prevent environmental degradation caused by facilities and infrastructure throughout their life cycle; and create built environments that are comfortable, safe and productive.
