

## TAXIWAY LL

### Recycled Content

- » 17% of construction materials contained recycled content including concrete base and bituminous paving materials

### Local and Regional Materials

- » 100% of construction materials obtained within 250 miles of the project site, primarily concrete and bituminous pavement and aggregates

### Innovation

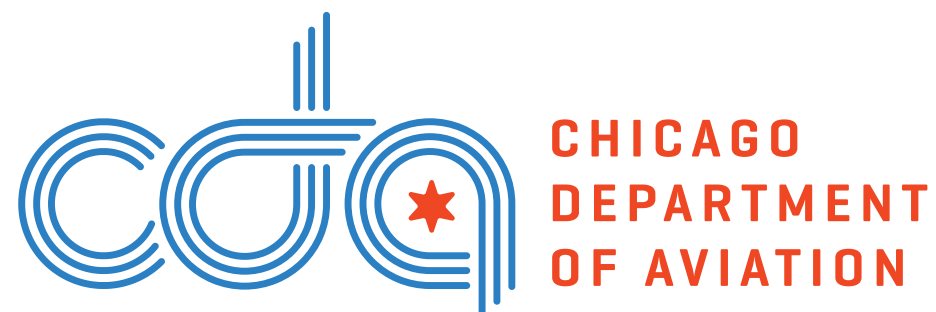

- » 7.4 acres of permeable artificial turf installed for all taxiway islands to reduce maintenance, heat island effects, and runoff
- » Warm Mix Asphalt (WMA) used for all bituminous pavement

# O'HARE

DESIGNER: **Jacobs Engineering Group**

In recognition of your outstanding leadership in pursuit of sustainability within the aviation industry.
