

TAXIWAY WK AND ENABLING PROJECTS

Optimize Energy Performance

- » LED taxiway and edge lights installed and nighttime sensors used for Mt. Prospect Road tunnel lighting

Construction Waste Management

- » 100%, or 1.4 million tons, of construction waste diverted from landfills including mainly soils and reclaimed asphalt

Recycled Content

- » 23% of construction materials contained recycled content including asphalt paving materials and concrete structures

Local and Regional Materials

- » 93%, or \$13.8 million, of construction materials obtained within 500 miles of the project site, primarily paving materials

Equipment Salvage and Reuse

- » Existing signage, guard booths, lighting fixtures, and pump were salvaged for reuse on other projects

CONTRACTOR: Turner - Concrete Structures - Lindahl Triventre

In recognition of your outstanding leadership in pursuit of sustainability within the aviation industry.
