

TAXIWAY WK AND ENABLING PROJECTS

Optimize Energy Performance

- » LED taxiway edge lights reduce energy consumption by 8%

Construction Waste Management

- » Nearly 100%, or 484,000 tons, of construction waste diverted from landfills including mainly concrete, soils, gravel, and reclaimed asphalt

Local and Regional Materials

- » 76% of construction materials obtained within 500 miles of the project site, primarily paving materials

Equipment Salvage and Reuse

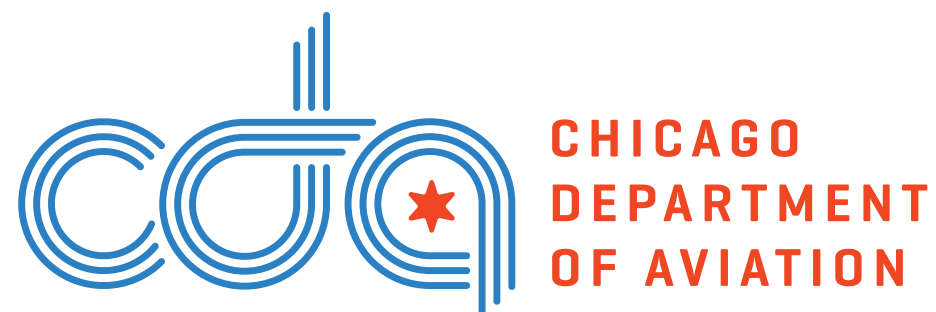

- » Existing signage, guard booths, lighting fixtures, and pump to be salvaged for reuse on other projects

O'HARE
