

TERMINAL 5 ROOF REPLACEMENT

Heat Island Reduction

- » 2,012 square foot vegetated green roof system installed on mezzanine level to reduce runoff and heat island effect

Construction Waste Management

- » 97%, or 745 tons, of construction waste diverted from landfills including concrete, roofing materials, and ferrous metals

Recycled Content

- » 10% of construction materials contained recycled content including concrete pavers and roof membrane

Local and Regional Materials

- » 54% of construction materials obtained locally within 250 miles of the project site, primarily concrete pavers and green roof materials
- » All locally obtained materials, \$3.4 million, obtained within 10 miles – Arlington Heights and Glenview, Illinois
